Latihan soal AKM pertemuan 15

1. Perhitungan harga obligasi

$$\begin{aligned} \text{Kupon per semester} &= 8\% \cdot \text{Rp } 600.000.000 \cdot \frac{6}{12} \\ &= \text{Rp } 24.000.000.000 / \text{periode} \end{aligned}$$

$$\text{Suku bunga efektif per semester} = \frac{10\%}{2} = 5\%$$

$$\begin{aligned} \text{Nilai sekarang Kupon} &= \text{Rp } 24.000.000 \cdot \text{faktor PVA } (i = 5\%, n = 10) \\ &= \text{Rp } 185.321.638 \end{aligned}$$

$$\text{Nilai sekarang Pokok} = \text{Rp } 600.000.000 \cdot \text{faktor PV } (i = 5\%, n = 10) = 368.347.952$$

$$\text{Harga obligasi} = \text{PV Kupon} + \text{PV Pokok} = \text{Rp } 553.669.590$$

Jurnal Pembelian 1 Jan 2015

Ket		
Investasi Surat Utang	553.669.590	
Kas		553.669.590

2. Carrying amount awal : 553.669.440

$$\text{Bunga efektif} : 553.669.440 \times 5\% = 27.683.472$$

$$\text{Kupon diterima} : 24.000.000$$

$$\text{Amortisasi diskon} : 27.683.472 - 24.000.000 = 3.683.472$$

$$\begin{aligned} \text{Carrying amount akhir periode 1} &= 553.669.440 + 3.683.472 \\ &= 557.352.912 \end{aligned}$$

Periode 2 (1 Agustus - 31 Desember)

$$\text{Bunga efektif} = 27.867.646$$

$$\text{Kupon diterima} = 24.000.000$$

$$\begin{aligned} \text{Amortisasi diskon} &= 27.867.646 - 24.000.000 \\ &= 3.867.646 \end{aligned}$$

Ket	D	K
Piutang Bunga	24.000.000	
Investasi Obligasi Afs	3.867.646	
Pendapatan bunga investasi		27.867.646
